LMA SERIES

LIVESTOCK SCALE - MULTIPLE ANIMAL

The LMA Series is a rugged, stationary, commercial livestock scale for group animal weighing.

LMA SERIES

LIVESTOCK SCALE - MULTIPLE ANIMAL

Weighing Solutions for the World Since 1830

DURABLE DECK THAT'S BUILT TO LAST

Feed lot operators, ranchers and farmers can rely on the accuracy of group animal weighments when using a commercially approved, heavy-duty LMA livestock scale. Like today's heavy-duty truck scales, the LMA features durable all-steel construction, electronic load cells, and a weighbridge that's supported by steel I-beams for reliable, enduring performance. The LMA is available in a wide range of sizes, all with 25,000 lb capacity.

RUGGED KICK PANEL AND RACK DESIGN

Because livestock are known to jump and kick when being corralled, the LMA utilizes 48" tall kick panels on all sides of the scale to combat routine wear and tear and reduce the possibility of animal injury. The solid steel panels also shield outside movement from the animals' line of sight, which helps keep them calm during the weighing process. The kick plates are attached to the scale's bolt-on racks and self-latching swing gates, which are made of 2" and 3" steel tubing for longevity.

Spring-loaded Latch Assembly
A heavy-duty, spring-loaded latch assembly secures the weighing enclosure after livestock are loaded.

SAFE, ANTI-SLIP FLOORING

The LMA features the most advanced animal safety flooring system available today. Made from recycled rubber and plastics, X-Lug flooring prevents harmful hoof slipping and, unlike wood, will not rot or harbor bacterial growth. For applications that require the use of wheeled devices on the scale platform, a less aggressive anti-slip flooring option, X-Plank, is available.

X-LUG SCALE DECK FLOORING

X-PLANK SCALE DECK FLOORING

OTHER FEATURES:

- Weighs 10 to 15 head of cattle, depending on scale dimensions and animal size.
- Swing gate access at both ends of the scale.
- Can be used on any firm surface with up to a 5 percent grade.
- Rugged, all-weather powder coat paint.

INSTRUMENT OPTIONS

The Fairbanks LMA Series offers instrumentation options designed to fit every type of application - from basic "weigh only" needs, to tracking head count, total weight, average weight, shrink and more.

FB2255
Basic Weighing

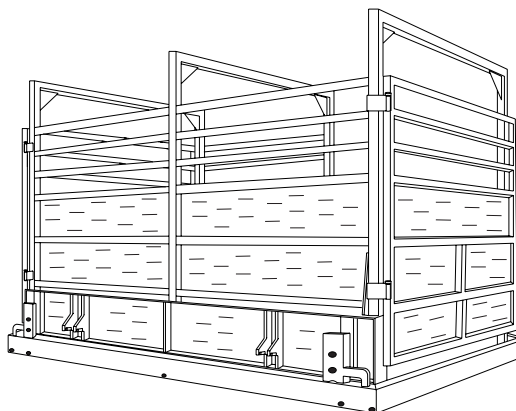

FB500
Intermediate Weighing

FB700 WeighCenter
Advanced Weighing

SPECIFICATIONS

- Capacity 25,000 lbs
- Dimensions 6 sizes available, see chart below
- Weighbridge construction . . . Steel, covered with X-Lug anti-slip flooring
- Deck profile 6 inches
- Finish Beige, powder coat paint
- Load cell Nickel-plated S-Beam, four per scale
- Minimum graduation 5 lbs
- Overload protection 150% of capacity
- Operating temperature 14° F to 104° F, -10° C to +40° C
- Shipping weight 4,540 to 7,900 lbs
- Approvals NTEP CC# 19-095

OPTIONS

- FB700 WeighCenter
- FB700 WeighCenter pedestal
- FB500 Instrument
- FB2255 Instrument
- Protective enclosure for FB500 or FB2255 instrument
- Ticket printer
- Remote display
- X-Plank flooring
- Group Animal Weighing software
