**MC** SERIES

# MASS COMPARATORS

## For management of masses in ASTM Class 2-7 and OIML Class F1 and below

Equipped with an internal mass for simplified calibration of the balance.  
Enhanced function settings reduce errors due to drafts and vibrations.

**Auto-centering Pan Options:** Improve mass comparison by correcting eccentric loadings.

with optional auto-centering pans

### AD-8922A (Remote Controller)

Use the optional AD-8922A to operate the balance without directly touching it, minimizing vibration.

# Precision balances with extended resolution

The MC Series may also be used as high resolution balances. Display weighing results with an extra decimal place not normally found in balances of this capacity. The extended resolution enables measurements of minute weight changes of heavy objects and small variations with heavy tare containers.
