ULTEGRA[®] SERIES

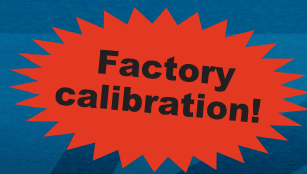

PARCEL SHIPPING SCALES

The long-time choice of global parcel shipping companies and mailroom shipping operations of all sizes, Ultegra Series scales accurately process weightments up to 150 lbs.

ULTEGRA® SERIES

PARCEL SHIPPING SCALES

Weighing Solutions for the World Since 1830

Fairbanks.com

Since 1999, the Fairbanks Ultegra® Parcel Shipping Scale has been a popular choice for mailroom shipping operations worldwide. There are more than 200,000 Ultegra scales in use today! This rugged and reliable parcel shipping staple is also suited for a variety of other non-washdown, general weighing applications up to 150 lbs.

ULTIMATE DURABILITY

The Ultegra is made with a high-impact gray ABS composite material that makes it lightweight, yet extremely rugged. The composite material is reinforced with molded structural ribs that provide up to 300 percent overload protection.

ULTIMATE ACCURACY AND PRECISION

The Ultegra platform is designed to control deflection (bending) when a load is applied, which significantly increases its accuracy. It also provides repeatable load introduction for the highest degree of precision offered.

ULTIMATE SPEED

The Ultegra's textured weighing surface reduces surface tension and allows boxes to slide easily across the scale. To maximize operator efficiency, a roller top model is also available.

UPS SOFTWARE COMPATIBLE

Ultegra Parcel Shipping Scales can be used for UPS shipping. All that is needed is a computer running a Windows® OS and UPS software (WorldShip® available exclusively from UPS).

OPTIONAL REMOTE DISPLAY

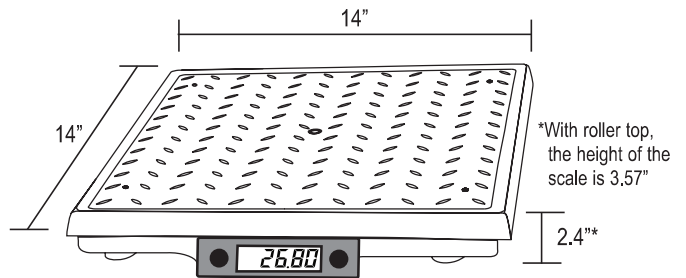

The optional remote display for the Ultegra scale is easily mounted to a wall or on the 18" tall remote display pillar accessory. This LCD display features 1.5" tall characters and an eight-foot cable.

Optional remote display and pillar stand.

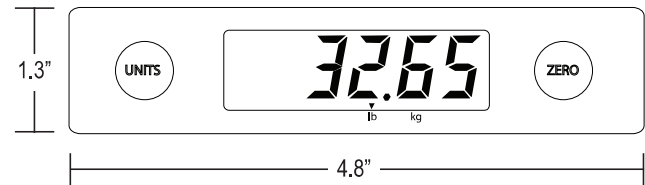

SPECIFICATIONS

Capacity	150 lbs (68 kg)
Division size	0.05 lbs (0.02 kg)
Platform size	14" x 14" x 2.4" (Flat top model) 14" x 14" x 3.57" (Roller top model)
